Flexible One-Knee Bob Sleighs.

These sleighs are intended for general farm and road work, and in the heavier sizes for lumbering. *Each runner is independently flexible.* There are but few parts and no mortised joints, so that the life of these sleighs depends entirely on the care taken to preserve the stock. Only the best oak, elm and maple is used in their construction. The irons are hand forged. The merits of this style of sleigh are making it constantly more popular and we consider it the best all around sleigh on the market.
